

SAMPLE SOP FOR MBA

Gone are the days when everyone considered engineering and management to be two distinct and diverse fields that did not correlate with each other. However, the brief academic exposure that I received to management during my engineering helped me understand these are two sides of the same coin which cannot exist without anchoring on each other. My further academic exploits helped me learn that management practices and strategies are important for an engineering project to become successful and be efficient. As I want to build a career in engineering in a managerial position, I understood that expanding my managerial and leadership capabilities will help me lead projects and teams better to improve the performance of the team as well as the efficiency of the project. Therefore, in order to develop and mold these important managerial skills, I decided to secure admission for MBA from York University so that my journey towards a gratifying career can be successful.

When it comes to my academic exploits, I have always been a keen learner who wanted to learn both the pragmatic and theoretical aspects of the subject that I learned. This has always helped me look for various sources for learning for the supporting me to perform well atomically. In addition to being an active learner. I never shied away from the opportunities that I received to participate in various extracurricular activities. Such learning experiences in both leadership and organizing capacities have help to me mold my personality as well as expand my communication, interpersonal, decision making and leadership skills. I am extremely positive that these skills will help me during my master program in Canada.

After deciding to pursue the MBA, I began looking for a suitable academic destination that can set me on the right path towards my career goal. I was particular about pursuing the MBA from a foreign institute due to the focused training experiences that foreign institutes offered. While I did search for Indian institutes, I was disappointed to find limited industry and global learning exposure limiting the growth potential of the students. As I am trying to improve my employability in a challenging professional environment, I wanted to gain skills that the industry demands right now. Hence, I realized that a foreign institute is the best option for me personally. As I continued my efforts to find a suitable destination for the MBA, I was convinced by the quality of education, student-centric academic offerings, and highly economic provided by Canada. Although I considered such destinations as the US, the UK and Australia, they were too expensive for me. As Canada offers better value for my investments without compromising on global learning exposure and quality, I chose to study there.

As I went on to find a suitable institute for the MBA, I found York University more student-centric and industry-oriented in its academic approach than most of the universities in Canada. The extensive learning infrastructure and experienced faculties of the university work together to create an exceptional academic setting that fosters the overall growth of its students. I found that the university offers impeccable learning opportunities both inside and outside of the classroom nurturing the comprehensive development of the students while preparing them for the real management challenges in today's technology-driven world. With various internship and project opportunities with leading companies in Canada, the university created an excellent academic package will support my career goals. Therefore, I decided to secure admission for the MBA from York University.

I am fully aware of the financial challenges that I must meet at Canada during the MBA. I have already made the arrangements to meet all the expenses of studying in Canada comfortably. The details of my sponsorship and financial wherewithal to support my MBA in Canada are provided with the application for your assessment.

At the end of the program, I would like to return to India and associate with a leading engineering company in a suitable managerial position. I would like to work in the first couple of years expanding my managerial and engineering skills while learning the machinations of the industry and imbibing effective industry insights to make myself a better engineer with strong leadership and management capabilities. In the long-term I wish to grow in my career to more responsible and dynamic leadership roles to support the growth of my employer in every way possible.
